Contents

Reflections on Inverse Projection: Its Origins, Development, Extensions, and Relation to Forecasting 1
RONALD LEE
1 Background 1
2 New Developments 4
3 Links to Forecasting Mortality and to Stochastic Population Projection 6
4 Toward a More General Model 8
References 9

Inverse Projection: Fine-Tuning and Expanding the Method 11
ROBERT MCCAA AND ELISABETTA BARBI
1 The Method 11
2 History and Scope 12
3 Expansions 17
4 Related Methods 19
5 Calibration and Limitations 23
6 Prospects 24
References 24

Using Information on the Age Distribution of Deaths in Population Reconstruction: An Extension of Inverse Projection with Applications 29
ALESSANDRO ROSINA
1 Introduction 29
2 Mortality Estimation in the Inverse Projection and in the Differentiated Version 29
3 Advantages of Using the Differentiated Version 33
4 Some Applications to Italian Data 33

5 Conclusion 37

The Stochastic Inverse Projection and the Population of Velletri (1590-1870) 39
SALVATORE BERTINO AND EUGENIO SONNINO
1 Introduction 39
2 The Method 40
3 The Simulation Program 45
4 The Population of Velletri 1590-1870 47
5 Conclusion 60
References 60

Testing Inverse Projection, Differentiated Inverse Projection and Stochastic Inverse Projection: A Reconstruction of the Population of Sardinia between 1861 and 1921 Using Three Different Techniques 73
LORENZO DEL PANTA AND VALERIO RODILOSSI
1 Overall Objective of the Project, Data and Procedures Presentation. 73
2 Results Regarding the 1862-1901 Period 77
3 Results for the 1901-1921 Period 79
4 Final Remarks 82
References 83

Comparing the Results from Generalised Inverse Projection and Stochastic Inverse Projection 95
ELISABETTA BARBI AND JIM OEPPEN
1 The Issues and Challenges of Generalised Inverse Projection and Stochastic Inverse Projection 95
2 Data 96
3 Results and Discussion 97
4 Conclusions 104
References 104

Cohort Reproduction Patterns in Small Italian Towns: Results from Stochastic Inverse Projection 107
SALVATORE BERTINO AND EUGENIO SONNINO
1 Introduction 107
2 The Municipalities 108
3 Demographic Trends 109
4 Reproduction Patterns 110
5 Comments 125
