

List of Figures

Fig. 2.1	Age structure in Sweden in 2000 compared to how it would have looked if fertility/mortality had remained constant at 1900 levels throughout the twentieth century. Percent of the population in each age interval, right-hand columns females (<i>red</i>), and left-hand columns males (<i>blue</i>)	9
Fig. 2.2	Share of the population over the age of 60, 1900–2000. Actual development and the development as it would have been with mortality held constant at 1900 levels	11
Fig. 2.3	Age-specific consumption, labour income, and size of cohorts, Sweden 2003	14
Fig. 2.4	Share of the population in age groups 0–19, 20–64, 65+, 1860–2050	14
Fig. 2.5	Projected aggregated life cycle deficit, 2008–2050. 2008 = 100	15
Fig. 2.6	Share of the population above the age of 65, 1930–2003. Actual development and the development as it would have been without any immigration	17
Fig. 3.1	Adjusted top statutory corporate income tax rates for Sweden, the EU27 and the 10 New Member States (NMS10), 1995–2007	26
Fig. 3.2	Implicit tax rates on labour in Sweden, the EU27 and the 10 New Member States, 1995–2005	27
Fig. 3.3	Top statutory personal income tax rates in the EU in 2005	31
Fig. 3.4	Implicit tax rates on consumption in Sweden, the EU27 and the 10 New Member States, 1995–2005	33
Fig. 3.5	Percent of employed individuals in the working-age population and the percent unemployed in the labour force, 1980–2007	39
Fig. 4.1	Pension at the age of 65 in relation to income in age groups 16–64 for different birth cohorts	52

Fig. 4.2 A schematic illustration of outgoing benefits with front-loaded indexation compared to benefits without front-loading 63

Fig. 6.1 Healthcare cost per person by age and type of healthcare, County Region of Skåne, Sweden 2004 82

Fig. 6.2 Simulated development of total number of days of inpatient care for the population aged 50–74, men and women respectively 90

Fig. 6.3 Simulated development of total number of days of inpatient care for the population aged 75 and above, men and women respectively 91

Fig. 7.1 A framework for classifying welfare states 111

Fig. 7.2 (a–c) Demographic structure before, during and after the transition from high to low fertility 114
