

Trends of Stillbirth Rates in Europe 2012-2021

Stillbirth rates in Germany steadily increased since 2010 from an initial 2.8 stillbirths per 1000 births to 3.7. in 2021.

Across Europe a similar increase has only been observed in Belgium.

For most European countries stillbirth rates either remained stagnant since 2010, as in Austria and Italy...

...or continued to decline, as in Denmark and Spain.
